

Dorado Country Club Estates  
Master Road Committee Report  
March, 2026

The master road committee did not meet this month.

The committee completed the project of placing rocks on the slope from the men's tee box on hole #6 down to Dorado Blvd. The maintenance crew for Generation Golf graciously moved the remainder of the rocks along the slope. Committee volunteers then spread dry cement along the top of the rocks. An inspection following the rain last week showed the cement had dried as expected. There was no dirt on the road following the rain, so this project is considered a success. Thanks to Generation Golf and all the volunteers who helped with this project.

The committee is still looking for volunteers to help coordinate the many tasks of the committee. Once again, representatives are asked to reach out to their HOAs looking for volunteers.

Respectfully Submitted

Debbie Yob

Master Road Committee Chair.
