

## **Landscape Committee Report to the Board – April 9, 2026**

As reported last month, Santa Rita Landscaping began providing services the beginning of March. We are on their Monday schedule, and the account manager sends a Photo Report of work completed by the end of the day.

Each week the crew focuses on one of four areas: west of the West Entrance, east of the West Entrance, west of the East Entrance and east of the East Entrance. On the first day of work in the area east of the East Entrance, the supervisor arranged for an extra crew due to the amount of weed removal and pruning that was needed.

In mid-March, the irrigation controller at the West Entrance was replaced and leaks at both entrances were repaired (seven leaks total). We have asked for recommendations for the East Entrance planters.

Backflow testing is due in mid-May, and Chuck Whitley has been scheduled to conduct the testing. The Master Association has three backflows, one at the East Entrance and two at the West Entrance.

Respectfully submitted,

Debbie Hill, Landscape Committee Co-chair
