

## **Rose Hill Wash Committee Report – May 20. 2026**

At the April 15 board meeting funding was approved for Phase 1 of the University of Arizona's *Rose Hill Wash Sediment Mitigation Proposal*. The contract was signed first by the University of Arizona and then by Sue Teaney on April 24.

On May 8, Sue Teaney, Rich Robertson and I met with Professor Duan and two students who will be working with her on the project. Afterward Rich and I walked with them along the wash between Speedway and Broadway. Professor Duan took multiple samples of sediment to analyze as well as many pictures. From our discussions, it is clear they are already working hard on this project.

There has been no communication from Bogardus Engineering or Elizabeth Leibold, City of Tucson Floodplain Manager, since October 2025.

Sandbags are still available and can be filled with sand from the wash. Contact me if there are homeowners in your sub-associations who would like to prepare for the upcoming monsoon season.

Respectfully submitted,

George Hill, Chair
