

Landscape Committee Report to the Board of Directors Nov 14, 2025

Committee members met twice in October. The focus was on considering updates to specifications for the landscape maintenance contract and evaluating the condition of vegetation at the East and West Entrances.

Palm tree trimming is planned for the first quarter of 2026.

HSL has completed buffelgrass removal on the SW Gas Parcel. Oleander shrubs at the West Entrance/SW Gas parcel boundary have been cut back.

Joe contacted the Oyster Mountain Club business manager about the poor condition of vegetation on its parcel along Dorado Blvd. She apparently was not aware of the situation and said she needs to talk with her board.

Respectfully submitted,

Joe Wilkinson and Debbie Hill
